

AMENDMENT  
Serial No. 09/759,773

**IN THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application

**Listing of Claims**

Claims 1-16 (canceled)

Claims 17-20 (canceled)

21. A method of making a non-Lambertian diffuser, the method comprising the steps of:

providing a substrate body having at least a first side;

selecting a blasting agent including a plurality of shot particles each having a size, a shape and a mass; and

forcing the blasting agent against the first side of the substrate body at a predetermined velocity to form a plurality of irregularities in the first side according to the size, shape and mass of the plurality of shot particles and the predetermined velocity to thereby form a diffuser surface structure in the first side according to a depth, contour and size of the plurality of irregularities;

wherein the step of providing further includes providing a substrate body formed from a glass material;

wherein the step of selecting further includes selecting the plurality of shot particles each having a diameter within a range from about 4 mm to about 0.045 mm and a general shape selected from the group consisting of hexagonal, rhombohedral, and spherical.
